Summary

Software Engineer over 2 years of experience building business applications, including e-commerce, HRM, and POS systems. Passionate about developing scalable, efficient, and user-focused web applications, with strong problem-solving, teamwork, and continuous learning skills. Aiming to grow into a senior full-stack developer and technical leader in the future.

Education

CAN THO UNIVERSITY

Sep 2020 - Dec 2024

- Information Technology
- GPA: 3.42

Skills

- **Programming Languages:** Javascript, Java, C, C#.
- **Frameworks and Libraries:** ASP.NET Core, Blazor, Node.JS, ReactJS, AngularJS, TypeScript, NextJS.
- **Databases:** PostgreSQL, MySQL, MongoDB,.
- **Tools:** XAMPP, Postman.
- **Version Control:** Git/Github, Jira.

Experience

● Visnam Trading Joint Stock Company

Oct 2025 - Present

- **SOFIPOS (6 members)**
 - Sales, Inventory, Cashflow & Debt Management, and Reporting Software for Small Businesses (Household Business).
 - **Technologies:** C#, Blazor (ASP.NET Core), PostgreSQL.
 - **Main duties:**
 - Developed inventory management features, including stock import/export tracking, quantity adjustments, and real-time stock monitoring.
 - Implemented cashflow and debt management modules, covering income/expense recording, receivables/payables tracking, and payment settlement workflows.
 - Built accounting workflows for small household businesses, including accounting books, declarations, and regulatory reports in compliance with government circulars.
 - Built internal tools to support customers in automating and optimizing business and financial operations.

- **VIN-HRM (6 members)**

- Human resource management system covering employee operations, attendance, leave, performance, and internal approval workflows.
- **Technologies:** C#, Blazor (ASP.NET Core), PostgreSQL.
- **Main duties:**
 - Developed workforce management features, including task management, work scheduling, attendance tracking, and employee timekeeping.
 - Implemented leave management and multi-step approval workflows for leave requests, overtime, and other internal processes.
 - Built OKR management and employee performance evaluation modules.
 - Developed an internal news feed with posts, comments, and reactions.
 - Implemented role-based access control and integrated Vin-BHXX for social insurance-related processes.

- **Erarin Software Technology Company (Fullstack Developer)**

Oct 2024 - Aug 2025

- **E-task Management System (6 members)**

- Developed a workforce management system for tracking employee tasks, project progress, and department performance.
- **Technologies:** NodeJS (Express.js), React.js, MongoDB, Socket.io.
- **Main duties:**
 - Developed a real-time project & task management system with notifications.
 - Implemented role-based access control with secure authentication for different user levels.
 - Designed and built responsive UI/UX with Bootstrap 4 for optimal user experience.
 - Built analytics dashboards for task tracking and team assignments.
 - Designed RESTful APIs optimizing database queries for 40% faster response time.

- **E-document (7 members)**

- A software solution to minimize manual data entry by extracting data from PDF files and supporting file export.
- **Technologies:** NodeJS (Express.js), React.js, MongoDB, Socket.io.
- **Main duties:**
 - Integrated API into the Bash shell for the desktop version.
 - Exposed API to run OCR for other systems.
 - Integrated Google Document AI API and Developed the user interface.

Additional Projects & Internship

Worked on multiple full-stack web applications, including a cosmetic e-commerce platform, football club management system, and online movie ticket booking website. Also completed a **Back-end Developer Internship at VNPT Cần Thơ (May 2024 - Jul 2024)**, contributing to an e-commerce website for computer components. Responsibilities included database design, RESTful API development, JWT/OAuth2 authentication, payment integration, responsive UI development, debugging, deployment, and performance optimization.

- **Tech Stack:** ReactJS, Redux, Material UI, NodeJS (ExpressJS), Laravel, MySQL, MongoDB, Sequelize, JWT, Social Login, PayPal Integration.
