Summary

Full-stack Software Engineer with 2 years of experience developing business applications using C#, ASP.NET Core, Blazor, React, and Node.js. Experienced in building RESTful APIs, implementing role-based access control, and developing workflows for HRM, POS, inventory, and accounting systems.

Skills

- **Programming Languages:** C#, JavaScript, TypeScript
- **Backend:** ASP.NET Core, Entity Framework Core, Node.js, Express.js, Socket.IO, RESTful APIs
- **Frontend:** Blazor, React.js, Next.js
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Tools & Version Control:** Git, GitHub, Postman, Jira

Experience

Visnam Trading Joint Stock Company (Full-stack Developer) **Oct 2025 - Present**

- **SOFIPOS (6 members)**

  Sales, inventory, cash flow, debt management, and reporting platform for household businesses.
  - **Technologies:** C#, ASP.NET Core, Blazor, PostgreSQL, Entity Framework Core, Socket.IO.
  - Developed inventory workflows for stock receipts, issues, adjustments, and real-time stock monitoring.
  - Implemented cash flow and receivables/payables workflows, including transaction recording, debt tracking, and payment settlements.
  - Developed accounting books, tax-related workflows, and regulatory reports for Vietnamese household businesses.
  - Built supporting tools to help customers streamline business and financial operations.

- **VIN-HRM (6 members)**

  Human resource management system for employee operations, attendance, leave, performance, and approvals.
  - **Technologies:** C#, ASP.NET Core, Blazor, PostgreSQL, Entity Framework Core, Socket.IO.
  - Developed task management, work scheduling, attendance tracking, and employee timekeeping features.
  - Implemented multi-step approval workflows for leave requests, overtime, and internal processes.
  - Built OKR management, employee performance evaluation modules, and an internal news feed with comments and reactions.
  - Implemented role-based access control and integrated VIN-BHXH for social insurance-related processes.

Eranin Software Technology Company (Full-stack Developer) **Oct 2024 - Aug 2025**

- **E-task Management System (6 members)**

  Workforce management system for tracking employee tasks, project progress, and department performance.
  - **Technologies:** Node.js (Express.js), React.js, MongoDB, Socket.IO.
  - Developed real-time project and task management features with notifications.
  - Implemented secure authentication and role-based access control for different user levels.
  - Built responsive interfaces and analytics dashboards for task tracking and team assignments.
  - Optimized RESTful APIs and database queries to improve application performance.

- **E-document (7 members)**

  Document processing solution that reduces manual data entry by extracting information from PDF files and supporting file export.
  - **Technologies:** Node.js (Express.js), React.js, MongoDB, Socket.IO.
  - Integrated APIs with Bash shell scripts for the desktop application.
  - Exposed OCR APIs for integration with other systems.
  - Integrated Google Document AI and developed the user interface.

Education

CAN THO UNIVERSITY **Sep 2020 - Dec 2024**

- Information Technology
- GPA: 3.42/4.0

Additional Projects & Internship

Back-end Developer Intern - VNPT Can Tho **May 2024 - Jul 2024**

Contributed to the development of an e-commerce website for computer components.

- Designed database schemas and developed RESTful APIs.
- Worked on JWT/OAuth2 authentication and payment integration.
- Supported debugging and deployment.

Other Projects

- Cosmetic e-commerce platform, football club management system, and online movie ticket booking website.
- Tech stack: React.js, Redux, Material UI, Node.js (Express.js), Laravel, MySQL, MongoDB, Sequelize, JWT, social login, and PayPal integration.
