Summary

I have almost 1 year of experience in web development at a software company. Good self-learner with excellent problem-solving, teamwork and communication skills. I always focus on optimizing user experience and system performance. Aim to become a professional full-stack developer and team leader within 3 years.

Education

CAN THO UNIVERSITY

Sep 2020 - Dec 2024

- Information Technology
- GPA: 3.42

Skills

- **Programming Languages:** Javascript, Java, C, C#.
- **Frameworks and Libraries:** Node.JS (Express.js), ReactJS, AngularJS, TypeScript, NextJS, .NET
- **Databases:** MySQL, MongoDB, Oracle.
- **Tools:** XAMPP, Postman.
- **Version Control:** Git/Github, Jira.
- **Language:** Ability to read and understand documents in English.

Experience

Visnam Trading JSC

Oct 2025 - Present

- **SOFIPOS (6 members)**
 - Sales, Inventory, Cashflow & Debt Management, and Reporting Software for Small Businesses (Household Business).
 - **Technologies:** C#, Blazor (ASP.NET Core), PostgreSQL.
 - **Main duties:**
 - Developed inventory management features, including stock import/export tracking, quantity adjustments, and real-time stock monitoring.
 - Implemented cashflow and debt management modules, covering income/expense recording, receivables/payables tracking, and payment settlement workflows.
 - Built accounting workflows for small household businesses, including accounting books, declarations, and regulatory reports in compliance with government circulars.
 - Built internal tools to support customers in automating and optimizing business and financial operations.

- **E-task Management System (6 members)**

- Developed a workforce management system for tracking employee tasks, project progress, and department performance.
- **Technologies:** NodeJS (Express.js), React.js, MongoDB, Socket.io.
- **Main duties:**
 - Developed a real-time project & task management system with notifications.
 - Implemented role-based access control with secure authentication for different user levels.
 - Designed and built responsive UI/UX with Bootstrap 4 for optimal user experience.
 - Built analytics dashboards for task tracking and team assignments.
 - Designed RESTful APIs optimizing database queries for 40% faster response time.

- **E-document (7 members)**

- A software solution to minimize manual data entry by extracting data from PDF files and supporting file export.
- **Technologies:** NodeJS (Express.js), React.js, MongoDB, Socket.io.
- **Main duties:**
 - Integrated API into the Bash shell for the desktop version.
 - Exposed API to run OCR for other systems.
 - Integrated Google Document AI API.
 - Developed the user interface.

VNPT Cần Thơ

May 2024 - Jul 2024

Back-end Developer

- **Develop an e-commerce website selling computer components.**
- **Team size:** 5 (3 Front-end, 2 Back-end).
- **My position in project:** Back-end Developer.
- **Technologies:** NodeJS (Express.js), ReactJS, MongoDB.
- **Main duties:**
 - Designed and created a database (MongoDB) for each service, optimized for fast query performance and data integrity.
 - Implemented user authentication with JWT, ensuring secure sign-in processes, and integrated OAuth2 for seamless login with Facebook and Google accounts.
 - Contributed to the development of RESTful APIs, implementing several key features to support user, product, and online payment management.

Other Projects

Aug 2023 - Dec 2024

Worked on multiple full-stack web applications, including a cosmetic e-commerce platform, a football club management system, and an online movie ticket booking website. Responsibilities involved analyzing requirements, designing system architecture and databases, developing responsive user interfaces, and implementing secure RESTful APIs. Focused on core features such as user authentication and authorization (JWT & social login), real-time data interaction, online booking and payment workflows, admin dashboards, and role-based content management. Additionally participated in deployment, debugging, performance optimization, and improving code structure and UI/UX for better usability and scalability.

- **Tech Stack:** ReactJS, Redux, Material UI, NodeJS (ExpressJS), Laravel, MySQL, MongoDB, Sequelize, JWT, Social Login, PayPal Integration.
